SUMMARY

Backend-focused developer specializing in secure, scalable server-side systems with Node.js, Express, Go, and MongoDB/PostgreSQL. Experienced designing REST APIs with robust validation, JWT authentication (access + refresh tokens), role-based access control, and third-party integrations including Stripe payments and Socket.io real-time services. Comfortable working across multiple backend stacks (Node.js, Go) and databases to ship production-ready APIs.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Go, Python, SQL
Backend: Node.js, Express.js, Gin (Go), REST API Design, Flask
Auth & Security: JWT (Access/Refresh Tokens), Role-Based Access Control (RBAC), Rate Limiting, Input Validation
Databases: MongoDB, PostgreSQL, MySQL, Supabase
Integrations: Stripe (Payments & Webhooks), Socket.io (Real-Time Services), Resend, Postman/API Documentation
Testing: Jest, React Testing Library
Tooling: Docker, Git/GitHub, CI/CD, VS Code, Deployment

PROFESSIONAL EXPERIENCE

Freelance / Remote Full-Stack Developer | Self-Employed (Remote) *Dec 2024 – Present*

- Design and build REST APIs and backend services (Go, Node.js/Express, PostgreSQL, MongoDB) for independent and client projects.
- Implement authentication, database design, and third-party integrations (JWT, Resend) across full-stack applications.

Freelance Backend / Full-Stack Developer | PeoplePerHour (Remote) *Jan 2023 – Nov 2024*

- Designed and implemented REST APIs with Node.js and Express.js, including robust validation, structured error handling, and rate limiting for production clients.
- Built authentication systems using JWT access + refresh tokens with role-based access control and token rotation.
- Developed a real-time notification service using Socket.io for a trading/dashboard application.
- Integrated Stripe subscription billing with webhook handling and plan management logic.
- Delivered client solutions 20% ahead of deadline on average while maintaining clean, maintainable, Postman-documented codebases.

SELECTED PROJECTS

URL Shortener (Full-Stack) — Go, Gin, PostgreSQL, JWT, Next.js, TypeScript

- Built a full-stack URL shortening service backend using Go and Gin, with PostgreSQL storage and JWT-based user authentication.
- Implemented link creation, custom aliasing, and redirect handling via a fast, concurrent Go API consumed by a Next.js frontend.

Paper Trading App (Full-Stack Mobile) — Express.js, MongoDB, Resend, React Native, Expo

- Built the Express.js/MongoDB backend for a mobile paper-trading app simulating stock buy/sell with virtual funds.
- Integrated Resend for transactional email and designed REST APIs consumed by the React Native/Expo client.

Portfolio & Academic Front Page Generator — Next.js, TypeScript, Tailwind CSS, PDFX

- Built a personal portfolio site and a form-driven tool that generates academic report front pages as downloadable PDFs.

EDUCATION

Bachelor of Science in Computer Science & Information Technology (Computer Software Engineering)
Tribhuvan University | Nov 2024 – Jan 2028 (In Progress)

CERTIFICATIONS

- SQL for Data Science Bootcamp — Udemy, 2025 | Data Analyst Bootcamp — Udemy, 2025
- Introduction to Cybersecurity | NumPy for Data Science & Machine Learning
